MODULO 4 | Desarrollo de Aplicaciones Móviles Android Kotlin | Ignacio Cavallo

https://github.com/cavigna/modulo_desarrollo_de_aplicaciones_moviles_android_kotlin

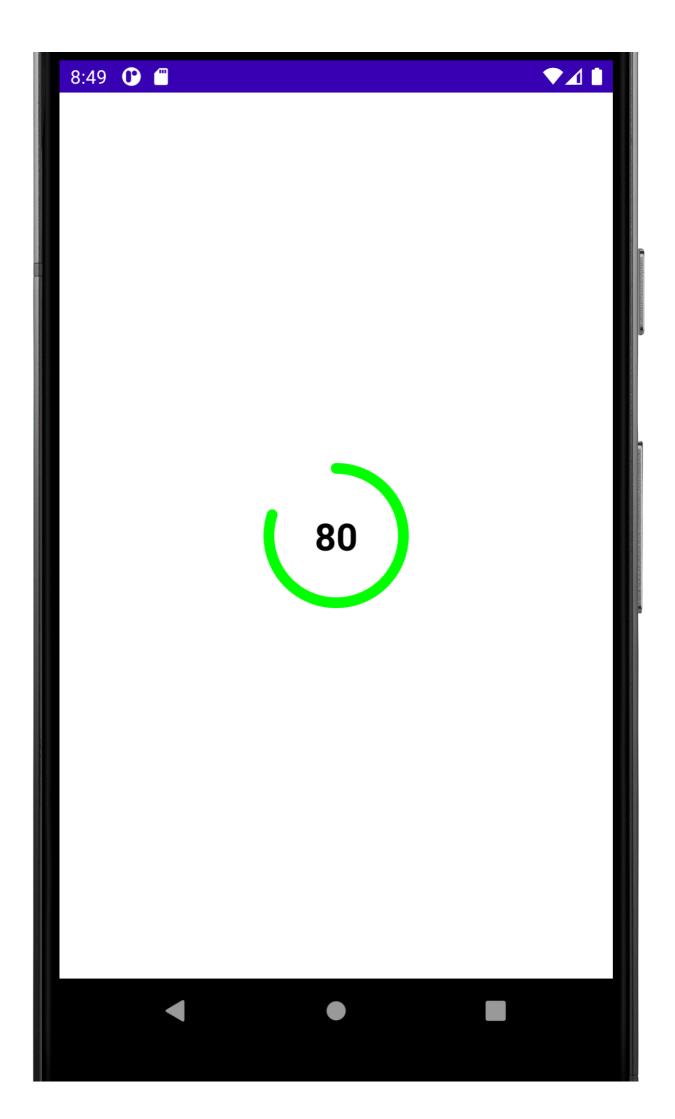

Clase 57 | 21-07

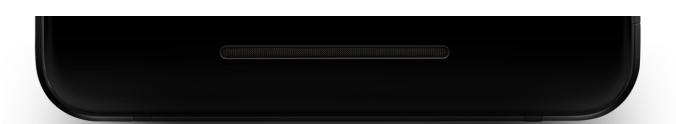

Como hoy se dispuso hacer exactamente lo mismo que en el módulo de java, decidí empezar a utilizar Jetpack Compose. Esta librería no tiene versión estable, y sigue estando en Beta por lo cual tuve que instalar una versión especial de Android Studio llamada **Fox Artic** y hacerle unos tuneos al gradle, ya que me daba error de Build. En definitiva, seguí un tutorial con el objetivo de hacer una **Barra de progreso Circular** *Animada*
